

VIRGINIA WING CIVIL AIR PATROL  
COVID-19 SCREENING QUESTIONNAIRE (UPDATED 8 MAR 2021)

**PART 1: SCREENING QUESTIONS (PLEASE RUN THROUGH ALL IN ORDER)**

**1. Have you tested positive for COVID-19?**

If YES, go to Part 2. If NO, proceed to next question.

**2. Have you been in "close contact" with anyone who has tested positive for COVID\*? (Close contact is defined by the CDC as contact within 6 feet for 15 minutes or more within 2 days of the onset of the infected person's symptoms) \*For HealthCare Workers: Have you been exposed to anyone diagnosed with Covid while not wearing proper PPE?**

If YES, go to Part 2. If NO, proceed to next question.

**3. Take your temperature. Do you have a fever of 100.4 or above?**

If YES, go to Part 2. If NO, proceed to next question.

**4. Do you have any of the following symptoms that are not explained by a current non-contagious medical condition?**

- new or worsening cough
- shortness of breath or difficulty breathing
- muscle or body aches
- fatigue
- chills
- new loss of taste or smell
- sore throat
- headache
- nausea or vomiting
- diarrhea
- congestion or runny nose

If YES, go to Part 2. If NO, proceed to the next question

**5. Have you recently travelled outside of Virginia for non-mission-essential reasons? (For CAP Missions, consult the Incident Commander)** If YES, go to Part 2.

**If you've replied "NO" to all of these questions, there should be NO problem with you attending your in-person activity. Please continue to wash your hands, wear a mask and follow social distancing guidelines even if you are fully vaccinated\*\*.**

**PART 2: FURTHER INFORMATION FOR "YES" ANSWERS**

"YES"- Question 1:

Per the CDC, you can be around others after

- 10 days since symptoms first appeared **and**
- 24 hours with no fever without the use of fever-reducing medications **and**
- Other symptoms of COVID-19 are improving\*

*\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation*

"YES"- Question 2

Wait 14 days after your last exposure before resuming in-person activities.

"YES" - Question 3:

You may be at risk of COVID infection and may not participate in the current activity. For all fevers, 24 hours must pass since the last fever without the use of fever-reducing medications (like Advil or Tylenol).

"YES" - Question 4:

Stay home and seek the guidance of your medical provider. See the information for "YES"-Question 1 if you think you may have COVID

"YES"-Question 5:

Whether you have been vaccinated or not, wait 7 days after the date of your return before attending in-person activities.

**\*\*Fully Vaccinated means that 2 full weeks have passed since your final dose (J&J requires only one dose). As of 9 March, the CDC still recommends that fully vaccinated people wear masks and practice social distancing unless with other fully vaccinated people. Fully vaccinated people do not have to quarantine if they come into contact with someone with COVID but they do need to follow the CDCs guidelines if they choose to travel.**
